Data Assessment Report Overview

DECISION: Approve version 1.0 of the Data
Assessment Report

John Wiggins

20 mins

Feedback Received:

- A number of Participants responded with feedback covering all roles (including code bodies).
- The majority of feedback related to clarifications which have been added to the document where appropriate.

- Key changes include:
 - Clarification of the role of the programme within the ongoing monitoring of participants against agreed plans.
 - The production of a Data Cleanse Plan, to be reviewed at the April TMAG meeting.

- Other points of note:
 - Added clarity that each identified data cleanse initiative will be mobilised under the Data Cleanse Plan – the plan will provide clarity to participants around timescales, responsibilities and actions to be undertaken.
 - The approval of the plan will be made by TMAG (expected May 2023) but dependant on draft version feedback.
 - The Data Cleanse Plan is referenced in Section C of the BSC, which provides the regulatory 'hook' with regard to Participants need to adhere to the requirements of each initiative within the plan.
