MHHS PROGRAMME

Industry-led, Elexon facilitated

MHHS Programme Objective

To develop and then implement an enduring process for MHHS that delivers benefits for consumers by maximising the opportunities provided by smart metering in enabling an intelligent, flexible energy system by October 2025

Delivering outcomes to support a more cost effective electricity system

Delivery-focused

Design-led, not code-led

Minimise dependencies

Utilise resources with appropriate expertise

Efficient decision-making to drive outcomes

Not move at the pace of the slowest

Collaborative working

MHHS PROGRAMME
Industry-led, Elexon facilitated

Ensure the Programme delivers industry and customer benefits

Operate openly and transparently for all Programme participants

Deliver the new Target Operating Model to quality, cost and on time

Bring in expertise and delivery partners to support Programme delivery

Support the pathway to net-zero, settlement and wider smart meter benefits

Provide a blueprint for future large industry programmes

|	
1 **Programme Structure**	We have defined the Central Programme structure
2 **LDP Procurement**	We have procured a Lead Delivery Partner (LDP)
3 **Design**	We have consolidated existing design groups into a new Design workstream
4 **Communications**	Our communications strategy is in place
5 **Separation**	We have listened to participants and defined a solution for implementation
6 **Governance**	We have consulted, signed off and implemented core elements of the Programme Governance Framework

Milestones, Deliverables and TAG

The first testing-related **Programme Milestone is M9 – System integration testing start**. For this milestone, TAG will be expected to make a recommendation to PSG.

TAG will be the **approver for all key testing-related deliverables** and there are a number of these in **H1 2022**. In addition, TAG may wish to review and/or discuss other testing-related deliverables.
M5 deliverables for TAG approval (in H1 2022)	
Approval Date	**Deliverable**
30/04/2022	**E2E Integration & Test Strategy**
30/04/2022	**E2E Data Strategy**
30/04/2022	**Data Plan for Industry-Wide Testing**

M5 deliverables of interest to TAG members (in H1 2022)	
Final publication due	**Deliverable**
30/04/2022	Data Working Group established and convened
30/04/2022	Pre-qualification guidance
30/04/2022	Requirement Traceability Matrix
30/04/2022	Requirements baseline

5 mins

Testing Advisory Group look forward

- TAGs will be scheduled for the 3rd Wednesday of the month going forward (next TAG 16th February 2022)

- We will look to start setting up Level 4 Working Groups before the next TAG (for example, Data Working Group)

- Ahead of February's TAG, please think about what you'd like to see from Integration & Test Strategy and Data Strategy

Next steps

- Confirm Actions from meeting
