

Cross Code Advisory Group #9 24 August 2022

Version 1.0

MHHS DEL576

Agenda

| # | Item | Objective | Туре | Lead | Time | Page |
|----|--|--|-------------|---------------------------------------|-------------------------------|------|
| 1 | Welcome | | | Chair | 10:00-10:05 5 mins | |
| 2 | Minutes and Actions | Approve minutes of previous meeting and review outstanding actions | Decision | Chair & Secretariat | 10:05-10:15 15 mins | |
| 3 | Programme Updates | Updates from MHHS Programme governance groups and the wider Programme [PSG webinar, CR009] | Information | Programme (PMO) | 10:15-10:20 5 mins | |
| 4 | Horizon Scanning Log | Review code changes relevant to the MHHS Programme and identify any actions required to minimise risks/impacts | Discussion | Programme (PMO) | 10:20-10:30 <i>10 mins</i> | |
| 5 | Design Success Criteria | Present the DAG-approved M5/design success criteria related to code drafting | Information | Programme (Jason Brogden) | 10:30-10:45 <i>5 min</i> s | |
| 6 | Code Drafting Approach Decisions | Discussion on legal text activation, change management, and enduring document management (see actions CCAG07-04 and 07-06) | Discussion | Programme (Andrew Margan) | 10:45-11:05 <i>15 mins</i> | |
| 7 | RAID Review | High-level review of relevant code risks contained in Programme RAID log | Discussion | Programme (PMO & Andrew Margan) | 11:05-11:30 25 mins | |
| 8 | dPMO Tool | Introduction and brief overview of the digital PMO (dPMO) tool | Information | Programme (PMO) | 10 mins | |
| 9 | CDWG Update | Update on CDWG and approval of latest ToR | Decision | Programme (Andrew Margan) | 11:00-11:10 10 mins | |
| 10 | Summary and Next Steps | Summarise meeting actions and next steps | Information | Chair & Secretariat | 11:40-11:45 <i>5 min</i> s | |
| | Attachments Attachment 1 - Code Drafting | Working Group Terms of Reference (draft) v0.4 (change marked) | | | | |

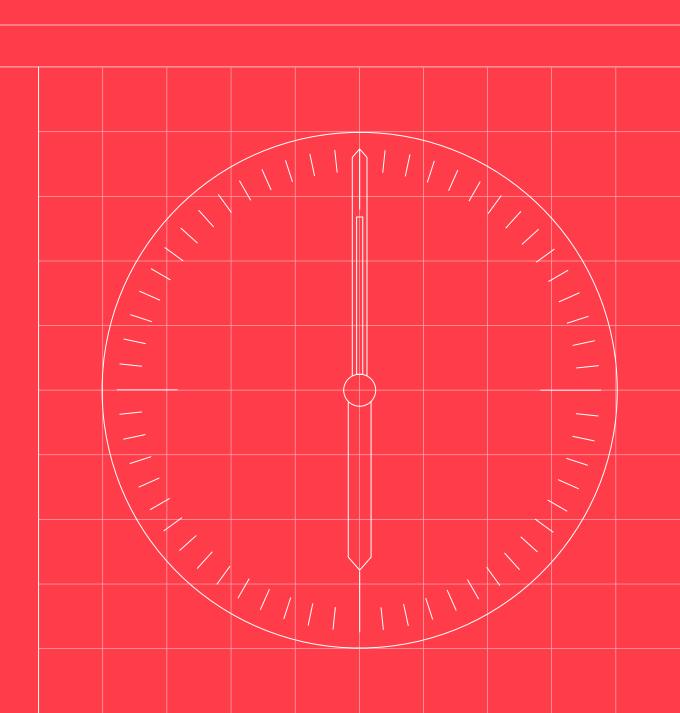

Minutes and Actions

DECISION: Approval of minutes of previous meeting and review of outstanding actions

Chair & Secretariat

Minutes and Actions (1 of 2)

- Approval of Minutes from CCAG meeting held <u>27 July 2022</u>
- Review of outstanding actions:

| Ref | Date Raised | Action | Owner | Due Date | Update |
|-----------|-------------|---|--|-------------|--|
| CCAG04-07 | 23/03/2022 | PMO to flag operational choreography document to CCAG once issued for consultation | Programme (PMO) | August 2022 | RECOMMEND CLOSED: Operational Choreography document published alongside Tranche 4 design artefacts and available here . Comments may be provided as part of the Tranche 4 review period, or directly to relevant DAG representatives. |
| CCAG07-05 | 22/06/2022 | Provide feedback on periods of activity in industry to be taken into consideration when determining the timing and durations of activities in the plan | All CCAG members | 20/07/2022 | RECOMMEND CLOSED: No feedback received. Known periods (e.g. Christmas) captured in Programme plan. |
| CCAG07-07 | 22/06/2022 | Meet to discuss the Ofgem steps within code release and implementation. Update the plan as required and present outputs in July CCAG | Programme & Ofgem | 20/07/2022 | RECOMMEND CLOSED: Meeting held and further feedback received from Ofgem. Updates made in the Programme plan |
| CCAG07-11 | 22/06/2022 | Consider the enduring referencing and hosting of design artefacts and how this should be brought into each code. Update the code draft principles for approval in July CCAG. | Programme (Andrew Margan) | 20/07/2022 | ONGOING: Prototyping of iServer for enduring solution ongoing. |
| CCAG08-01 | 27/07/2022 | Speak with design team and clarify the process of how data item industry changes are tracked and managed within the Programme | Programme (Fraser Mathieson) | 17/08/2022 | ONGOING: Discussion in progress. |
| CCAG08-02 | 27/07/2022 | Ensure CCAG members have edit permissions for the Horizon Scanning Log | Programme (PMO) | 03/08/2022 | RECOMMEND CLOSED: Permissions updated and link shared with CCAG members |
| CCAG08-03 | 27/07/2022 | Add Elexon issue group 101 looking at the enduring running of the DIP to the Horizon Scanning log | Programme (PMO) & Supplier Agent Representative | 17/08/2022 | RECOMMEND CLOSED: Issue group added to Horizon Scanning Log |
| CCAG08-04 | 27/07/2022 | Meet with Justin Andrews (DAG chair) to discuss CCAG member concerns that some design artefacts are not sufficient to draft code from | Chris Welby | 17/08/2022 | ONGOING: Discussion to be held. Similar action from DAG for DAG Chair discuss monitoring and management of code changes with CCAG Chair. |
| CCAG08-05 | 27/07/2022 | Discuss with REC any implications for code drafting as a result of MHHS on the REC that sit outside scope of the Programme design. Raise with design as required (e.g. through CCIAG) | Programme (Jason Brogden) | 17/08/2022 | ONGOING: Update to be provided at CCAG 24 August 2022. |

Minutes and Actions (2 of 2)

| Ref Date Raise | d Action | Owner | Due Date | Update |
|----------------------|--|------------------------------|------------|--|
| CCAG08-06 27/07/2022 | Provide feedback and supporting rationale on whether new code needs to be implemented for qualification (i.e. if qualification start is dependent on M6 (CCAG approval of code) or M8 (code implementation)). If code does not need to be implemented for qualification, provide feedback and rationale on the time at which new code does need to be implemented. | CCAG members | 17/08/2022 | ONGOING: Feedback received from some CCAG members and input into agenda item 6 for discussion. |
| CCAG08-07 27/07/2022 | Progress discussions on the enduring solution for hosting design artefacts and bring back to CCAG: 1. Whether the design will be maintained post go-live (and if so, how) 2. Confirm for all code bodies the role iServer plays for their code drafting | Programme (Jason Brogden) | 17/08/2022 | ONGOING: Please see action CCAG07-11. |
| CCAG08-08 27/07/2022 | Determine the approach to drafting topic areas that will not be drafted from the design baseline (e.g. qualification, transition) and bring to back to CCAG. | Programme (Andrew Margan) | 17/08/2022 | ONGOING: To be confirmed with RECCo regarding items to be raised at CCIAG. |
| CCAG08-09 27/07/2022 | Raise transition design dependency to the Programme RAID log | Programme (PMO) | 17/08/2022 | RECOMMEND CLOSED: Dependency raised to RAID log. |
| CCAG08-10 27/07/2022 | Update CDWG Terms of Reference with feedback from CCAG (e.g. clarity on CDWG scope and reference suite of documents required to be maintained) for approval next month | Programme (Andrew Margan) | 17/08/2022 | RECOMMEND CLOSED: ToR updated and changed marked version issued with CCAG 24 August 2022 meeting papers. |
| CCAG08-11 27/07/2022 | Stand down August CDWG | Programme (PMO) | 28/07/2022 | RECOMMEND CLOSED: Meeting stood down. |
| CCAG08-12 27/07/2022 | Confirm when legal input will be provided in the steps of the code draft plan | Programme (Andrew Margan) | 17/08/2022 | RECOMMEND CLOSED: BSC legal review will be undertaken for each topic area (prior to consultation and, if required, post consultation). |

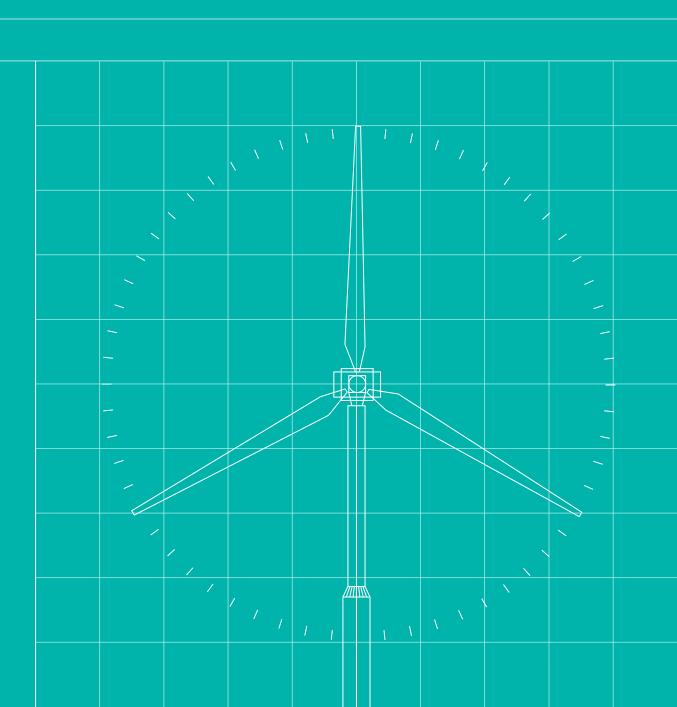

Programme Updates

INFORMATION: Updates from MHHS Programme governance groups and the wider Programme

Programme - PMO

Programme Updates

Governance group updates

Programme Steering Group (PSG)

Updates from PSG 10 August 2022

- Interim Plan the PSG approved an updated interim plan which addresses a recent Large Supplier Change Request
- 2. Central Systems Plans DCC and Helix provided an overview of their delivery plans and progress against them
- 3. Programme Re-plan the Programme provided an update on the Round 1 replan consultation
- CR009 Decision the PSG approved a recommendation to Ofgem that CR009 be implemented
- 5. Key Programme Issues the PSG discussed two key issues and associates actions around SEC MP162 and migration
- IPA Baseline Health Check the IPA presented an executive summary of their Baseline Health Check, providing several recommendations
- 7. Design Progress formal consultation on the Tranche 4 design artefacts commences August 2022, and issues resolution process have been put in place

PSG Headline Report available here

Testing and Migration Advisory Group (TMAG)

Agenda items for TMAG 17 August 2022

- Programme Re-plan Review the TMAG will review the latest Programme re-plan information ahead of further rounds of consultation in August and September 2022
- Working Group Updates the TMAG now has four working groups under its purview – the DWG, MWG, QWG, and EWG
- PPC Introduction the Programme's PPC team provided an overview of their role in engaging and supporting participants and provided information on where support can be obtained

TMAG Headline Report is available here.

Design Advisory Group (DAG)

Updates from DAG 10 August 2022

- Tranche 4 Approval the Tranche 4 design artefacts have now been issued. Participants may provide comments immediately. Formal comment window operated 20 August – 16 September 2022
- Review of RAID the DAG discussed the design risks associated with industry code change and resolved to drive improvements to the monitoring and management of code changes via the CCAG Horizon Scanning Log
- 3. Transitional Plan work is ongoing to define transition requirements and consideration is being given to the available options and associated complexity/cost in conjunction with the TMAG and Migration Working Group
- 4. Design RAID Review the DAG reviewed the design risks in the RAID register to ensure the descriptions and classifications were correct and up-to-date

DAG Headline Report are available here

Wider Programme updates

Programme re-plan

- Round 1 consultation on the Programme re-plan was issued on 1st August
- There are three consultation rounds:
 - Round 1 1st-26th Aug 2022. Selected high-level planning artefacts to improve consensus on structure, durations, sequencing, and to test high level RAID items
 - Round 2 12th Sept 7th Oct. Full draft plan with all activities, durations, dates. RAID items
 - Round 3 31st Oct 11th Nov. Final 'by exception' check after M5
- All Round 1 documents are available on the MHHS Programme Website
- Replan playback sessions per constituency have been scheduled for the start of August. Recordings will be made available

Collaboration Base relaunch

- The Programme has recently updated and improved the Collaboration Base. This includes:
 - · New layout and site navigation
 - Dedicated workstream pages with documents, papers and info
 - A Programme calendar
 - The Digital Programme Management Office (DPMO) a custombuilt digital tool with an interactive set of dashboards displaying key Programme information
- Please contact PPC@mhhsprogramme.co.uk for access or more information

Design progress

- The MHHS design has been progressing as per the recent design reschedule
- The full E2E design will be available on 08 August for industry review
- **Design walkthrough sessions are scheduled throughout August.** A range of support material is also being made available to industry.
- For more information, please contact PPC@mhhsprogramme.co.uk

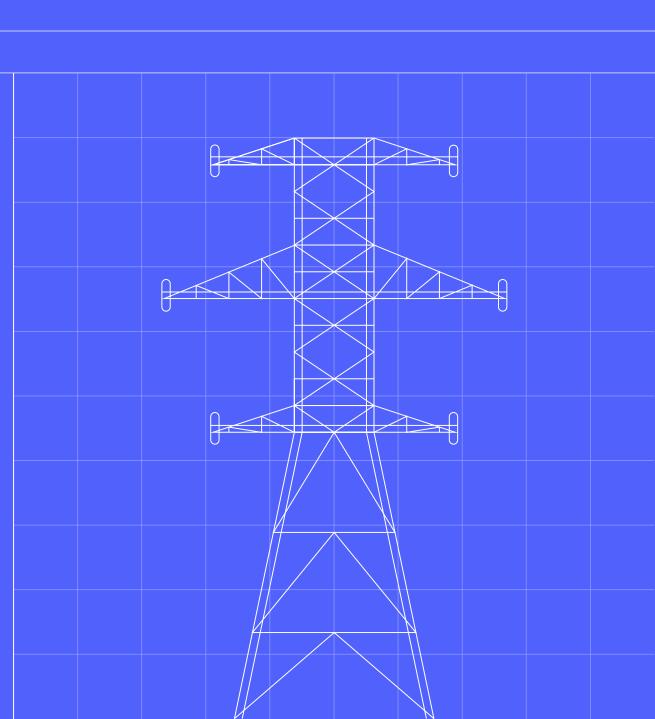

Horizon Scanning Log

DISCUSSION: Review code changes relevant to the MHHS Programme and identify any actions required to minimise risks/impacts

Programme – PMO

Horizon Scanning Log

CCAG Horizon Scanning Log Process Review

A process is required to monitor and manage external industry change which may impact the MHHS Programme

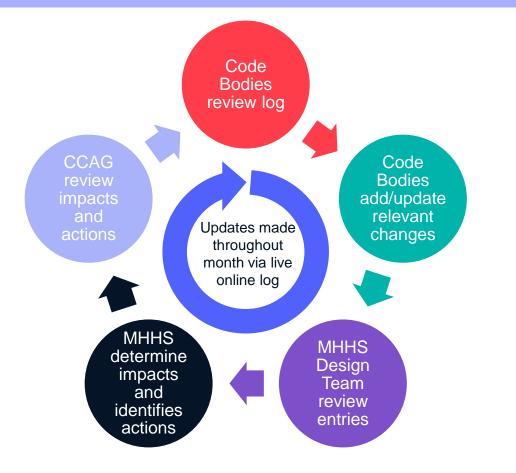

CCAG agreed a process whereby code bodies would update the Programme, the Programme would assess changes for MHHS impacts, and CCAG would review the escalated items

The process is not capturing code changes or wider industry change effectively, and this has been discussed at both DAG and PSG

CCAG views on current process, any issues/gaps, how improvements can be achieved?

Reminder: Horizon Scanning Log Process

Live log available on the MHHS Portal - please contact PPC@mhhsprogramme.co.uk if you require access

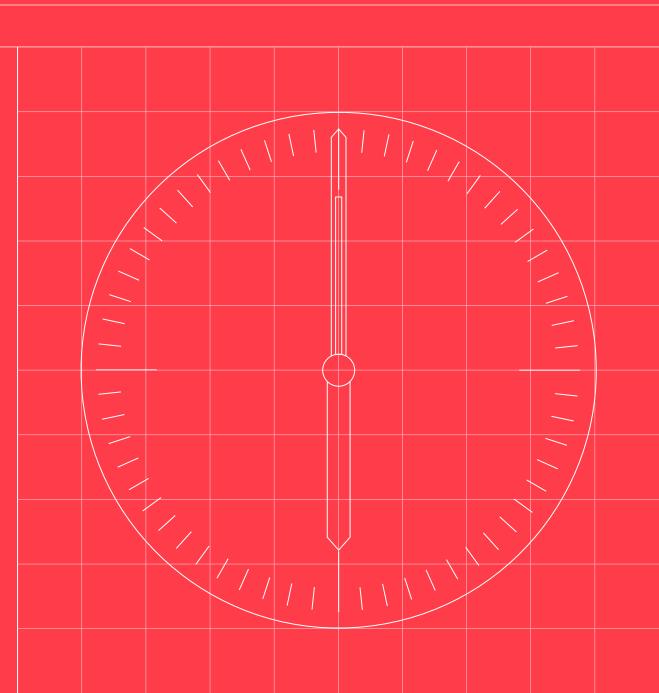

Design Success Criteria

INFORMATION: Present the DAG-approved M5/design success criteria related to code drafting

Programme – Jason Brogden

Background

- DAG approved the M5 Acceptance Criteria in following slide
- Whilst it is noted that the criteria are potentially subjective, the nature of developing a design across an industry is a subjective process

Therefore, the approach agreed with DAG is as follows:

- The Programme will evidence to DAG how it believes the criteria have been achieved at M5
- DAG will review the evidence and any supporting information DAG would like to include in the decisionmaking process
- DAG to agree to baseline the design (M5) and any work-off plans based on the evidence and supporting information submitted

M5 acceptance criteria

| | Criteria |
|--------------|---|
| DAG | We believe the Design meets the TOM requirements We believe the Design meets the agreed design principles We believe the Design is complete and sufficient to enable participants to commence their own detailed design, and that the SI have appropriately assured it We believe all open material design issues have been resolved, and any residual issues and work-off plans are agreed We believe the change request process and the SI facilitation thereof is appropriate We believe the Design is defined appropriately to allow Code drafting to reflect the design without further design debate or further clarifications |
| Participants | I have had the opportunity to engage in the development and review of the Design Artefacts My contributions have been used or I have received reasonable justification as to why not I know what to expect post M5 As an experienced industry technical person, I believe the Design Artefacts can be used to commence my detailed design activities and any associated sourcing of software and services |
| CCAG | 1. We have been kept updated of Design progress to enable the code resource plan to be developed 2. We believe the Design is defined appropriately to allow Code drafting to reflect the design without further design debate or further clarifications |

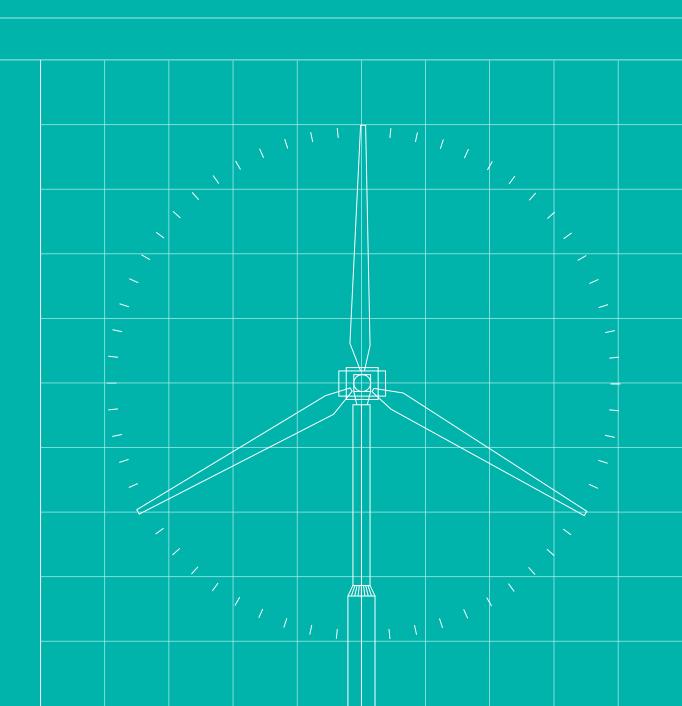

Code Drafting Approach Decisions

DISCUSSION: Text activation, change management and enduring document management (see actions CCAG07-04 and 07-06)

Programme – Andrew Margan

Mid-month CCAG Code Drafting Requirements

Update

CCAG to confirm when code drafting is required?

If the code drafting is later than pre-qualification a change control process will need to be developed

Prototyping the code drafting and the use of Iserver is planned for late August

| # | Subject | Options | Solution | Action |
|---|------------------------|---|--|---|
| 2 | Text activation (M8) | Implementation/code release options Linked to Qualification Linked to M9 Testing Linked to M10 Transition document needs to be complied with ahead of go-live | The CCAG plan assumes the code implementation is the first available code release after code drafting delivery (M6), with a back-up release. Both releases being before qualification. The challenge is should the code implementation be in a much later release and how much later. Options – CCAG Approval, Ofgem Approval/Designation, Code go-live date is first release or a later release. | CCAG Homework 1) Is there a difference between CCAG approval vs Ofgem approval/designation for legalising code changes for participants? 2) What is the preference for code to implemented? E.g. Pre-Qualification or Premigration? |
| 3 | Text amendment post M8 | Standard mod process Centrally developed under CDWG | Assumed to be BAU mod process. Exception could be a result of testing or final mop up post migration. | The text amendment solution is dependent on the Participant resource to item 2. |
| 7 | Enduring solution | Iserver vs digital code (Other options) | Prototyping Iserver with load shaping service | Under development |

Mid-month CCAG Code Drafting Requirements

Code Activation – Options Analysis

| # | Option Description | Pros | Cons | Implications |
|---|--------------------------------------|---|---|--|
| 1 | M8 delivered prequalification (ASAP) | Aligns with current Programme planning Gives industry oversight of text under individual codes to assess new modification changes | and result in misalignment with | Text changes will be managed by individual codes (not MHHSP) Under existing code governance, Panels will assess new changes against MHHS text |
| 2 | | Enables a single code release MHHS text central stored and easier to find | Panel's won't assess new mods against MHHS text | Text change pre-release will be via MHHSP governance A MHHS change control mechanism and version control matrix will need to be developed and resourced Pre-release code bodies will need to manage and align MHHS text to latest code version |

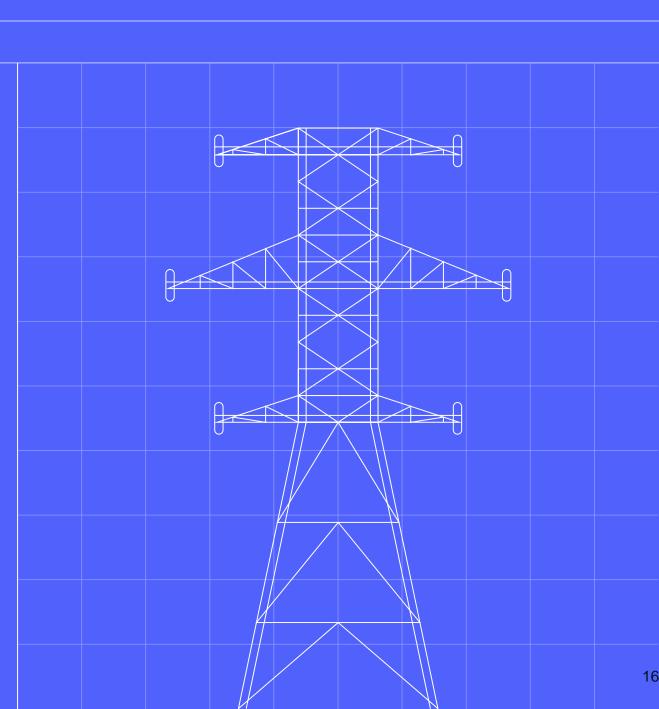

RAID Review

DISCUSSION: High-level review of relevant code risks contained in Programme RAID log

Programme – PMO & Andrew Margan

Top Code Risks

We have captured a number of code related risks within the Programme RAID log, the top risks have been outlined along with a view of the movement towards the targeted closure score

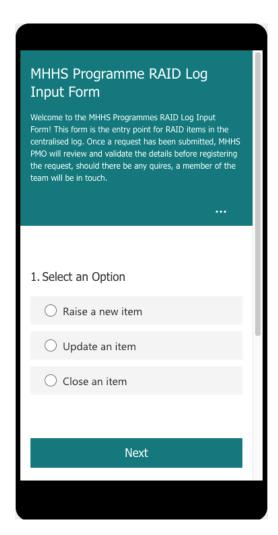

| Risk | | | Risk Score Assessment | | | | | | |
|------|---|--|----------------------------------|------------------|------------------------|-------------|---------------|--|--|
| ID | Risk Description | Impact Description | Critical 30 29 28 27 26 25 24 23 | High | Medium | Lov | w 4 3 2 1 | Mitigation Plan | |
| | | | 30 29 26 27 20 25 24 25 | 22 21 20 15 16 1 | 17 10 13 14 13 12 11 1 | 0 9 0 / 0 3 | 4 3 2 1 | | |
| | Mod P162 with the currently proposed solution in the currently planned timescales or there is a delay to approval whilst the competition issue escalated to IPA from Independent Agents is | This may result in the SEC Mod P162 solution being revisited to address any reasons for rejecting Mod P162 with subsequent redesign, Impact Assessment, Modification Processing and revised implementation date for SEC Release | | 00 | | | | 1)The Programme is discussing implications with Ofgem, IPA, DCC and SECAS to agree next steps to mitigate impact 2) 2)Ongoing engagement with SEC through programme attendance at MP162 governance groups and SEC representatives attendance at DAG for any MP162 discussions. 3)Agree next steps for SEC Mod P162 following SEC Change Board recommendation to reject 4)Assess the impact of any agreed next steps on the Programme (in terms of scope, design and plan). 5)Ofgem to make a future decision on SEC Mod P162 or any alternative solution 6) SRO leading discussions with Ofgem for MHHS aspects of MP162 | |
| | There is a risk that the CCAG Horizon Scanning (external change management) process is not followed which means the design or the code drafting is misaligned to the external industry environments | This may result in the programme delivering system processes or code changes which don't align with other industry arrangements | | 10 | | | | 1)To raise concerns at the August CCAG to request feedback as to how the process can be improved and managed 2)Escalate concerns to the Code body panel 3)Additional programme resource is required to manage the code body and horizon scanning process centrally | |
| R167 | There is a risk that the Design Artefacts are not fit for purpose for Code Drafting | This may result in the milestone 5 target date not being met (currently 29/07/22, proposed new M5 date is 30/10/2022) | | 0 | 9 | | | 1)A prototyping exercise is scheduled to test the drafting of regulatory code using a component of the Design. 2)Through the sub group Code Bodies meetings we have developed a query process for when additional design clarifications are required to deliver code drafting 3)Regular code drafting meetings in place between the Programme and code drafters to identify any potential issues early | |
| R207 | There is a risk the iServer prototype will highlight that the tool is not sufficient to support the enduring code draft models (under BSC and REC) | This may result in the need to identify an alternative approach to ensure there are no impacts to programme timescales | | | G | | | 1)A prototype of iServer is currently being run to test the functionalities of the tool to ensure it is sufficient to support drafted code 2)Alternative approaches are being considered to draft code which are more aligned to the traditional code updating procedures | |
| | There is a risk that there may be a material volume and/or individual large changes required to the design after M5 (e.g. as a result of testing, code drafting, or raised by Programme Participants) that require code drafting to be paused and/or approached differently | This may result in a delay to the time taken to deliver code drafting such that code is not released in advance of qualification start | | | 10 | - | | 1)The SRO/LDP team will manage all the queries 2)Monitoring and managing the change request process | |

| | Кеу | | | |

| 0 | Initial Score | | | |
| C | Current Score | | | |
| 1 | Target Score | | | |

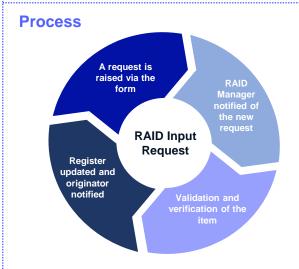

RAID Log Input Form

To control the flow of information input to the RAID log by participants, we have designed and developed a RAID log input form

Purpose

The <u>RAID Log Input Form</u> is the single point of entry for participants to raise, update and close RAID items in the centralised log.

- 1. A request is raised via the input form by a Programme participant (PP)
- 2. A notification is sent to the RAID Manager containing the new items and details captured
- The RAID Manager will verify and validate the request, liaising with members of the team and/or the originator should further clarifications be required
- 4. Once the details are validated, the RAID Log will be updated, and the originator is notified

Benefits

- Allows the programme to maintain control of the content of the RAID Log
- Provides a single point of entry for PPs to input into the RAID log and avoids long emails trails
- · Ensures quality standards are upheld by allowing items to be triaged and validated before they are accepted
- Reduces the risk of data corruption and loss by limiting active users to the RAID Log

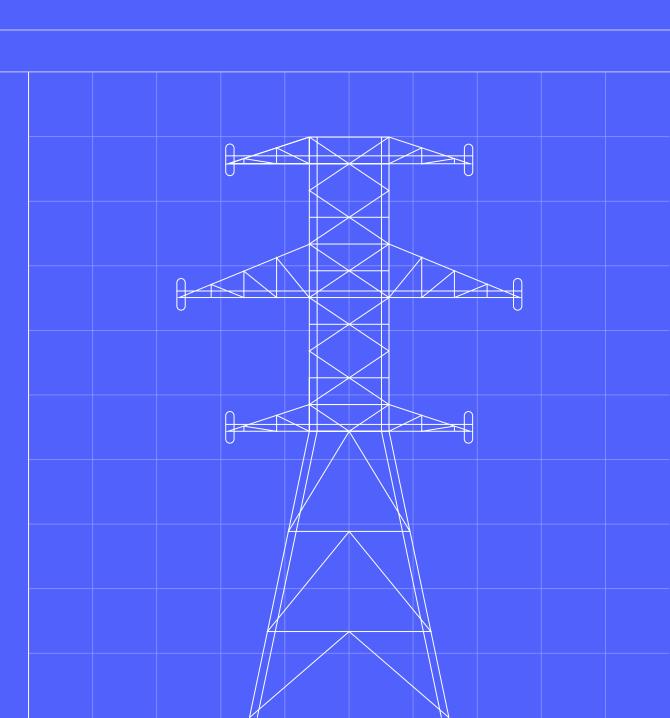

dPMO Tool

INFORMATION: Introduction and brief overview of the digital PMO (dPMO) tool

Programme – PMO

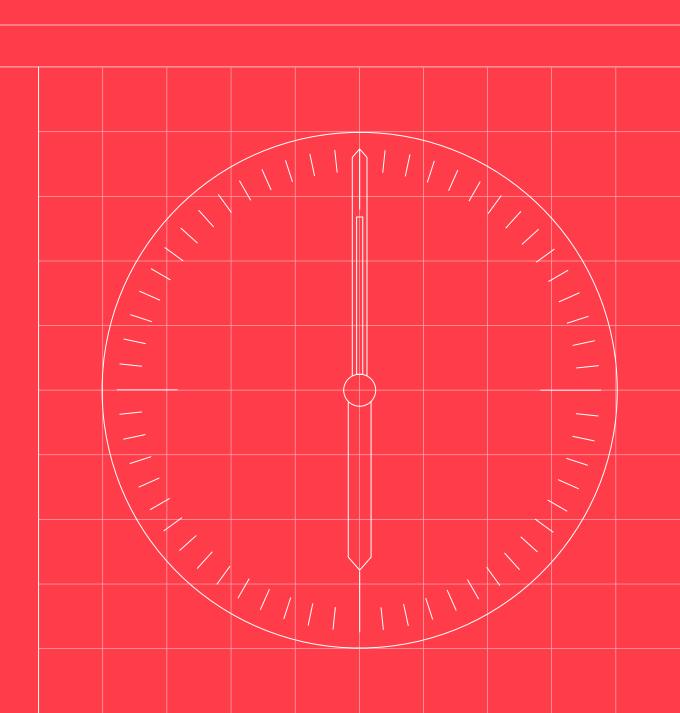

CDWG Update

DECISION: Update on CDWG and approval of latest ToR

Programme – Andrew Margan

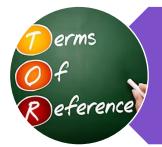

CDWG Updates

August CDWG update

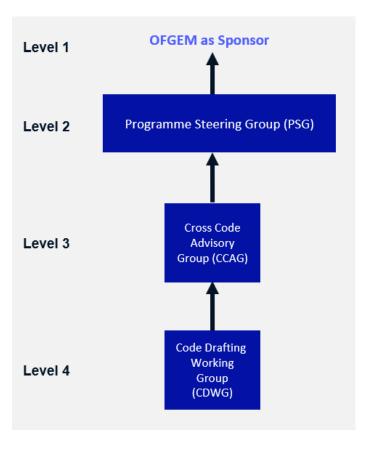

September CDWG decision

Latest ToR updates

Extract of MHHS Programme Governance Structure

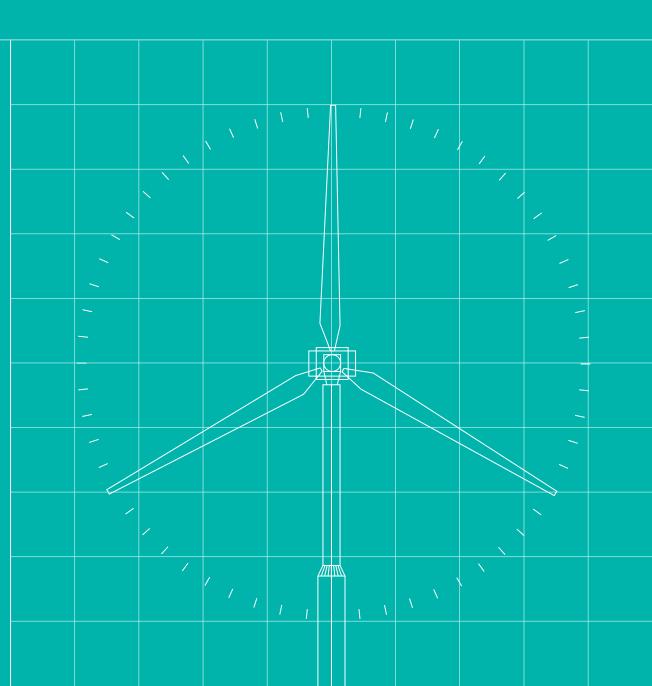

Summary and Next Steps

INFORMATION: Summarise meeting actions and next steps

Chair & Secretariat

Next steps

- Secretariat to confirm actions and decisions from meeting
- Next CCAG meeting 28 September 2022 at 10:00am
- CCAG Agenda Roadmap:

| Meeting dates | 24-Aug | 28-Sep | 26-Oct | 26-Nov |
|----------------------------------|--|--|---|--|
| Relevant milestone or activities | Code drafting plan commences | | | M5 (subject to CR009) |
| Agenda items | *Code drafting preparation update *Operational Choreography document *Code drafting approach to referencing design/Iserver | *Post-M5 Replanning Activity (CCAG consultation inputs) *Code Drafting Preparation Checklist *Code drafting planning update *Code drafting approach to referencing design/Iserver *Code drafting mobilisation *CCAG Report | *Post-M5 Replanning Activity (CCAG consultation inputs) *Code Drafting Preparation Checklist *Code drafting planning update *Code drafting mobilisation *Code drafting plan update *Code drafting approach report | *M6: Code drafting process commences (subject to M5) *CCAG Status Report draft |
| Standing items | *Minutes & actions *Agenda roadmap *Horizon scanning log *Governance group updates *CDWG updates | *Minutes & actions *Agenda roadmap *Horizon scanning log *Governance group updates *CDWG updates | *Minutes & actions *Agenda roadmap *Horizon scanning log *Governance group updates *CDWG status report | *Minutes & actions *Agenda roadmap *Horizon scanning log *Governance group updates *CDWG status report |
